

Atta Ur Rehman

Python Developer | Automation & Web Scraping | FastAPI Backend Development

03094380450 | attaurrehman.builds@gmail.com | linkedin.com/in/attaurrehman962 | github.com/attarehman962

Summary

BS Computer Science student specializing in Python backend development, automation, and web scraping with FastAPI. Primary focus is building automated tools and APIs — most notably a security misconfiguration scanner combining Python scraping (HTTPX, Playwright), FastAPI REST services, and PostgreSQL-backed persistence. Additional hands-on experience with full-stack web development from an internship role.

Experience

Software Developer Intern

Apr 2026 – Present

QuantumLogicsLabs

Remote

- Built FastAPI/Flask REST endpoints for core application features, integrating PostgreSQL/MySQL with ORM-based data access layers.
- Maintained structured Git workflows including branching, pull requests, and code reviews in a collaborative team environment.
- Contributed a reusable React component library with API-driven UI flows to support frontend integration.

Featured Project

Security Misconfiguration Scanner — Python Automation & FastAPI Platform

[GitHub](#)

Python, FastAPI, HTTPX, Playwright, PostgreSQL, SQLAlchemy, Alembic, JWT, Docker, pytest, GitHub Actions

- Built a Python automation and web scraping module (HTTPX + Playwright) to crawl static and JS-rendered pages and detect web security misconfigurations across 10+ automated checks, with CSV export of results.
- Built a FastAPI REST platform exposing the automation engine via JWT-authenticated endpoints, with background scan jobs, scan history, severity scoring, and remediation guidance.
- Designed PostgreSQL schema with SQLAlchemy ORM and Alembic migrations to persist users, scans, findings, and scraped results.
- Built a standalone Python CLI (table/JSON output) as a lightweight automation entry point for local, no-auth usage.
- Dockerized the platform for isolated local testing; set up pytest, Ruff, mypy, and GitHub Actions CI for the automation pipeline.

Other Projects (Full-Stack Experience)

Mini BEAMS360 Admissions CRM — EdTech Dashboard

[GitHub](#) | [Live Demo](#)

React, FastAPI, PostgreSQL, JWT, RBAC, Tailwind CSS

- Built REST APIs and role-based dashboards for an EdTech admissions CRM prototype with student lead tracking.

DocMate — Full Stack PDF Workspace

[GitHub](#) | [Live Demo](#)

React, FastAPI, SQLAlchemy, PostgreSQL, pypdf, ReportLab

- Delivered a full-stack PDF platform with 8+ file operations and an automated text-extraction pipeline for OCR and summarization.

Technical Skills

Python Automation & Scraping:	HTTPX, BeautifulSoup, Playwright, Static HTML Parsing, CSV Export
Backend / FastAPI:	FastAPI, Flask, REST API Design, SQLAlchemy, Pydantic, Alembic, JWT Authentication
Languages:	Python, JavaScript (ES6+), SQL, C, C++
Databases:	PostgreSQL, SQLite, MySQL
Security:	Security Headers, CORS Misconfiguration Detection, SSL/HTTPS Checks, Risk Scoring
Testing:	pytest, pytest-asyncio, pytest-cov, unittest, Ruff, mypy
DevOps:	Docker, Docker Compose, GitHub Actions, Git, GitHub, Linux CLI
Frontend (secondary):	React, Tailwind CSS, HTML5, CSS3

Education

BS Computer Science

2022 – 2026

FAST-NUCES, National University of Computer and Emerging Sciences

Pakistan

- Relevant Coursework: Data Structures & Algorithms, Databases, Operating Systems, Computer Networks, Web Security
